

Imdex launches structural logging solution

Imdex has launched its end-to-end STRUCTURAL-IQ solution for structural logging.

The company said this provides significant benefits to minerals clients, including real-time, secure access to verified structural data directly from the field.

Commenting on the launch, Imdex's global manager for integrated solutions, Michelle Carey, said:

“Our integrated solution will ensure resource companies have confidence in the accuracy of the data they are relying on to make critical drilling and mine planning decisions. It will also provide clients with operational efficiencies – key workflow processes will be automated and data can be provided in real-time for faster, intelligent decision making. Simply put, resource companies will be able to extract maximum value from their data while enjoying the economic benefits.”
