

IMDEX
HUB-IQ™

Make decisions faster with real-time data

IMDEXHUB-IQ™ is a secure, cloud-based portal for validating field data seamlessly transmitted from the drill rig and integrated with leading industry software. Whether you're at the drill site or in the office, IMDEXHUB-IQ™ assists in the understanding of field data, optimise your drill program and deliver quality results, sooner.

Make decisions in the moment

With access to real-time data, decisions can be made while operations are live. Not next week after the data has been adjusted and certainly not after the drill rig has finished and left the site.

See the bigger picture

Transparency across multiple streams of data, associated with a single drill hole or an entire operation allows managers to monitor activity and ensure quality decisions in the field, wherever they are.

Information, not just data

The rigorous data validation and built-in QA/QC at the time of data collection, ensures that only data that can be transformed into valid, actionable information is transferred.

Seamless integration

IMDEX is partnering with leading industry software partners, such as Seequent, acQuire and MICROMINE, enabling the secure sharing of data between IMDEXHUB-IQ™ and our partners.

Simple and secure chain of custody

With no manual intervention or paperwork required, errors and inefficiencies in the workflow are reduced and decisions are made on verifiable data.

OUR INTEGRATION PARTNERS

IMDEXHUB-IQ™ is ideal for applications across the exploration life cycle, providing efficient drillhole and sample data management; from daily reporting requirements, to structural logging, geochemical analysis and QA reporting.

DRILLHOLE PLANNING

Plan projects and drill holes to securely share with drilling contractors via IMDEXHUB-IQ™.

WORKFLOW MANAGEMENT

Seamless connection with REFLEX tools, IMDEX MOBILE™ and the IMDEX MUD AID™ means data can flow efficiently within a secure chain of custody.

ROBUST QA/QC

IMDEXHUB-IQ™ provides validation at the point of collection and data sign off within the portal for complete workflow control.

3D DRILLHOLE VISUALISATION

Integration with Seequent's Central software means you can now visualise and analyse your drillhole data alongside your 3D model in real-time.

THIRD PARTY INTEGRATION

Link to a corporate database or third-party software such as Seequent Central, ioGAS™ or acQure for further interpretation and visualisation.

AUTOMATED & AD HOC REPORTING

Build and automate reports within IMDEXHUB-IQ™ to monitor drilling programmes, daily progress, safety, project costs and KPIs.

USER PERMISSIONS & AUDIT LOG

Easily manage user permissions for tools and projects, monitor drilling progress and data sharing.

ROBUST SECURITY

IMDEX is a globally recognised cloud service provider, our team of IT professionals monitor information security. IMDEXHUB-IQ™ is hosted on a ISO27001 certified platform and practices are aligned with ISO27001.

COMING SOON

Even more integration, analytics, automated alerts, reports and user-friendly dashboards to simplify and assist the critical decision-making.

Get to work immediately

Implementation of IMDEXHUB-IQ™ is simple and does not require software installation or extensive training. Get started today by contacting your nearest IMDEX, AMC or REFLEX representative.
