

IMDEX MOBILE™

Hassle-free paperless daily drill reports, safety forms, pre starts, survey information and more.

IMDEX MOBILE™ is the mineral industry's leading choice for paperless data collection and productivity cost reporting. This off-the-shelf software ensures supervisors, managers and stakeholders can make confident decisions based on real-time data they can trust. With an easy to use interface, strict data verification QA process and seamless integration to IMDEXHUB-IQ™, this application provides streamlined workflows and reporting for drilling optimisation.

Real-time visibility

Familiar industry preferred user interface and simplified workflows ensures data entry is quick, easy, information is clean and human error is minimised. IMDEX MOBILE™ provides an auditable paperless reporting system that aids the achievement of a safe, efficient and transparent work site.

Sync and go

We have worked closely with our clients to create over 20 ready-to-use industry standard forms and reports, from daily drill reports, pre-starts, verified cost reports to rig productivity. We are committed to continually enhancing our service offering, so subscribers will receive free updates as we add new functionality.

More integration than ever

Have complete visibility of operations through one user interface; REFLEX tool data, IMDEX MUD AID™ and IMDEX MOBILE™ are all delivered from a common award-winning platform, IMDEXHUB-IQ™. API integration with third party software is also available for data export and more.

What are you waiting for?

Implementation of IMDEX MOBILE™ with rapid on-boarding IMDEXHUB-IQ™ means clients can be up and running in the field right away. Get started today by contacting your nearest IMDEX, AMC or REFLEX representative.
